DETAILED ACTION

Claim Objections

1. Claims 42, 45, 48, and 51 are objected to because of the following informalities: there are two periods at the end of each claim. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 42-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al., hereinafter Sato (US Patent 6,388,857).

a semiconductor wafer which comprises:

an integrated circuit of figures 4 and 7 including:

a centrally disposed core region, any region at the central location of the circuit ;

at least one bond pad 5 disposed between said core region and scribe region, the region at the right of the pad;

an electrostatic discharge device D2 beneath the pad; and

an I/O buffer II disposed between said scribe region and said core region and laterally of said bond pad relative to said core region and said scribe region. Although, Sato does not disclose a plurality of circuits on a wafer, it would have been obvious to one of ordinary skill in

the art at the time of the invention to make a plurality of the same circuits on a wafer in order to mass produce the device and reduce the production cost by means of simultaneously perform similar processing steps on the wafer.
